- Grouting and Siliconing
- Whole-House Water Filtration Systems

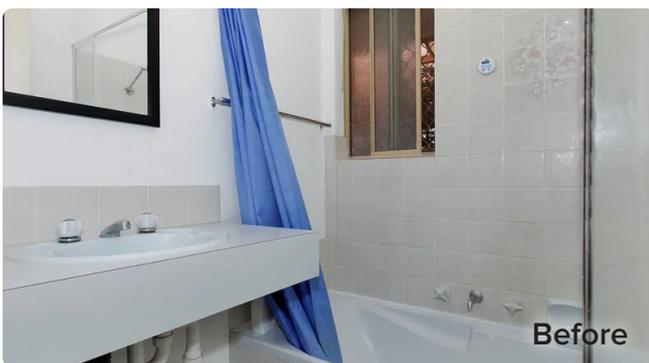

Feature Projects

Hotel Bathroom Renovation

Complete transformation of outdated hotel bathrooms into modern, high-end facilities. Works included full demolition, waterproofing, tiling, plumbing upgrades, and installation of bespoke vanities and fittings. The project was delivered on schedule with a strong focus on durability and aesthetics.

Full Home Renovation

This renovation was completed for an investor with the objective of achieving maximum resale value while keeping costs to a minimum. Strategic upgrades included new flooring, fresh paint, modern bathroom finishes, appliance upgrades, new benchtop, down lights throughout, and the addition of built-in mirrored wardrobes. The property was then professionally staged to highlight its features. With minimal spend, these targeted improvements transformed the home into a highly marketable asset, delivering maximum impact and an excellent return on investment.
